

Breast Imaging Center of Excellence Requirements

Overview

The American College of Radiology recognizes breast imaging centers that achieve excellence by seeking and earning accreditation in all of the ACR's voluntary breast imaging accreditation programs and modules in addition to the mandatory Mammography Accreditation Program by providing them a certificate that identifies them as a Breast Imaging Center of Excellence. The College will award the designation and one certificate at no additional fee to a center to acknowledge their dedication to improving women's health by participating in these rigorous quality assurance programs. All Breast Imaging Center of Excellence facilities will be identified by the symbol shown below on the ACR's "[Accredited Facility Search](#)" Web page. (Visit www.acr.org/accreditation.aspx and click on "Accredited Facility Search.")

In order to receive the ACR's Breast Imaging Center of Excellence designation, a center must be fully accredited in:

- Mammography by the ACR (or an FDA-approved state accrediting body),
- Stereotactic Breast Biopsy by the ACR, and
- Breast Ultrasound by the ACR (including the Ultrasound-Guided Breast Biopsy module)

The ACR is the leader in quality programs for breast imaging. As such, it is developing new initiatives to stay current with the science and technology that drive radiology practice as well as the clinical needs of the profession. In the future, centers may need to meet more rigorous requirements, such as performing expanded audits or achieving accreditation in Breast MRI, to maintain their designation as Breast Imaging Centers of Excellence.

Certificates

The ACR will send a Breast Imaging Center of Excellence certificate to each center which fulfills the above requirements. A center's BICOE designation will remain in effect as long as all of its breast imaging facilities (whether they are at the center's home location or at a different location) remain accredited in all required breast imaging services provided. If the center neglects to renew any of its

accreditations or fails during renewal, the ACR will notify the center that it no longer has the BICOE designation and that the ACR BICOE certificate must be removed from public display.

In most cases, centers will not need to complete any forms to receive a certificate. The ACR will consult its database and *automatically* provide an eligible center a Breast Imaging Center of Excellence certificate if a center is at a *single physical location* and its

- Mammography facility is accredited by the ACR, and
- Mammography, stereotactic breast biopsy and breast ultrasound facilities are accredited under exactly the same name

Some centers will need to specifically request a Breast Imaging Center of Excellence designation. The ACR has no way of identifying a breast imaging center’s affiliated facilities if they have different names or are located at different physical locations. These eligible centers must complete a Breast Imaging Center of Excellence Request form in order to receive a certificate. The request form must be signed by the owner/officer and lead interpreting physician of each affiliated facility. Furthermore, centers must notify the ACR if imaging locations are no longer affiliated with the center.

Because the ACR cannot maintain records of facilities accredited by state mammography accrediting bodies in its database, eligible centers accredited in mammography by states will also need to complete a Breast Imaging Center of Excellence Request form and provide the ACR a copy of their current Mammography Quality Standards Act (MQSA) certificate.

How to Obtain Breast Imaging Center of Excellence Certificates		
If Center’s	ACR Automatically Sends Certificate	Center Must Request Certificate
1) Mammography facility is accredited by ACR, <i>and</i> 2) Mammography, stereotactic breast biopsy and breast ultrasound facilities have exactly the same name, <i>and</i> 3) Mammography, stereotactic breast biopsy and breast ultrasound facilities are at the same physical location	✓	
Mammography, stereotactic breast biopsy and breast ultrasound facilities are accredited under different names (see your ACR accreditation certificates)		✓
Mammography, stereotactic breast biopsy and breast ultrasound facilities are at different physical locations		✓
Mammography facility is accredited by state (<i>and not ACR</i>)		✓

The ACR will send *one* Breast Imaging Center of Excellence certificate to the lead interpreting physician for the center’s mammography facility. Centers may obtain additional certificates for affiliated facilities or replacement certificates for a small fee.

Additional Information

Visit the ACR web site at www.acr.org and click on “Accreditation” for request forms and further information on the [Breast Imaging Centers of Excellence](#) as well as information on all of the ACR’s [accreditation programs](#). To contact the ACR Breast Imaging Accreditation office by phone, dial (800) 227-6440.
