### ACR LEADERSHIP AND GOVERNANCE

- **Council**
  Comprised of leaders from all ACR chapters, branches of the military, government agencies, qualified subspecialty societies and member sections, the ACR Council meets annually to conduct the business of the College. When not in session, the Council Steering Committee (CSC) provides oversight of all activities of the council. Members of the CSC serve as liaisons to those groups with council representation and the commissions of the College.

- **Board of Chancellors**
  The Board of Chancellors (BOC) is the executive body of the ACR and conducts business in accordance with ACR bylaws. The BOC implements programs and activities to accomplish policy goals through commissions, committees and task forces.

- **Chapters**
  Today there are 54 chapters representing each of the United States, the District of Columbia, Puerto Rico, Canada and the Council of Affiliated Regional Radiation Oncology Societies (CARROS). Chapters provide ACR members the opportunity to attend local meetings, connect with colleagues and engage in advocacy at a state and local level.
Dear Colleague,

We are pleased to welcome you to the ACR 2018 Annual Meeting — a truly wonderful and collaborative forum where ACR leaders come together to conduct the business of the College and where members can benefit from programming developed to meet their specific needs.

During the next several days, as we discuss College policy and the key economic and legislative issues impacting our profession, we hope that you will take full advantage of the networking and discussion opportunities available to you:

This includes:

- **Chapter Leaders Workshop** — Saturday, May 19
- **Resident and Fellow Section (RFS) Meeting** — Saturday, May 19 and Sunday, May 20
- **Young and Early-Career Professional Section (YPS) Meeting** — Sunday, May 20
- **Leadership Reports, Presidential Address and Keynote Address** — Sunday, May 20
- **Speed Mentoring** — Monday, May 21
- **Economics Forum** — Monday, May 21
- **Open Microphone Session** — Tuesday, May 22
- **Moreton Lecture from Anupam B. Jena, MD, PhD** — Tuesday, May 22
- **Luncheon Address from Nicole Saphier, MD** — Tuesday, May 22
- **Congressional visits during Capitol Hill Day** — Wednesday, May 23

As always, we thank you for your tireless work on behalf of the College and your vital contribution to advancing the practice, science and professions of radiological care.

Sincerely,

James A. Brink, MD, FACR
Chair, ACR Board of Chancellors

Timothy L. Swan, MD, FACR
Speaker, ACR Council

William T. Herrington, MD, FACR
Chair, Program Committee

CONNECT WITH THESE ATTENDEES AT ACR 2018

Resident and Fellow Section (RFS)
Numbering more than 9,000, ACR members-in-training represent some of the brightest and most active residents and fellows. RFS members work to develop programs and resources that benefit trainees and the specialty as a whole. During the two-day RFS Annual Meeting, Saturday and Sunday, residents and fellows gain practical tools for career development from dedicated programming and ePoster abstracts. Participants also join in meaningful discussion with fellow RFS members and have the opportunity to network with prominent radiology leaders.

Young and Early Career Professional Section (YPS)
More than 5,000 members of the ACR YPS focus on issues relevant to those younger than age 40 or within the first eight years of professional practice. Representing a vital College demographic, YPS members are instrumental participants in state radiology societies and grassroots advocacy. Through dedicated programming held on Sunday at the ACR Annual Meeting, these early-career professionals can grow their professional networks and build skills in practice management, leadership, advocacy and economics.

Senior and/or Retired Section (SRS)
The Senior and/or Retired Section of the ACR is for members age 65 and older and/or those retired from practice. This group collaborates on promoting opportunities for continued professional involvement and mentorship, enhancing retirement opportunities, and encouraging members to be ambassadors of the ACR to fellow physicians, medical physicists, health care organizations and patients.

### Medical Students at ACR 2018

The ACR welcomes medical students from across the U.S. who are eager to learn more about a career in medical imaging. Medical students are invited to participate in the entirety of the ACR 2018 meeting; however, a special schedule has been developed with sessions of most interest. This includes the RFS Annual Meeting, a 2-hour session on Saturday afternoon and networking opportunities with peers and ACR leadership. Visit [acr.org/annual-meeting](http://acr.org/annual-meeting) for medical student program details.

## ACR 2018 Diversity Forum: Women in Radiology — Why Men Should Care

**Sunday, May 20 | 8:00 – 9:30 a.m., Maryland A**

This session will feature a panel of male academic and private practice radiology leaders who will provide insight and input on how we can mentor, support and advance women radiologists at all career levels to achieve gender parity. Women radiologists across career stages will also discuss their perspectives about the state of women in radiology.

Anupam B. Jena, MD, PhD  
Associate Professor of Health Care Policy  
Harvard Medical School  
As an economist and a physician, Anupam B. Jena, MD, PhD, has been a significant research contributor to health economics and policy areas relating to physician behavior and workforce, health care productivity, medical malpractice and the economics of medical innovation. He has received Research America’s Eugene Garfield Award, the NIH Director’s Early Independence Award and the International Society for Pharmacoeconomics and Outcomes Research (ISPOR) New Investigator Award. | Marriott Ballroom |

Nicole Saphier, MD  
Director of Breast Imaging, Memorial Sloan Kettering Cancer Center  
Challenging the archaic stereotype of radiologists, Nicole Saphier, MD, a physician, legislative activist, author and media contributor, breaks the barrier between the reading room, patients and clinicians. Outside of her clinical and research duties at Weill Cornell Medical College and as Director of Breast Imaging at Memorial Sloan Kettering Cancer Center, she is active in health care advocacy and legislation, and a national news media commentator on medical and health policy topics. | Washington Rooms |

2018 GOLD MEDALISTS OF THE ACR

Marilyn J. Goske, MD, FACR
Cincinnati, Ohio

Marilyn J. Goske, MD, FACR, is founder of the Alliance for Radiation Safety in Pediatric Imaging and Chair Emeritus of the Image Gently® campaign, a program that incited worldwide efforts to promote safety in diagnostic imaging.

After graduating from the University of Connecticut School of Medicine in Farmington, she completed a radiology residency and pediatric radiology fellowship at Strong Memorial Hospital in Rochester, NY.

While section head of pediatric radiology at Cleveland Clinic Children’s Hospital, Dr. Goske, along with a colleague, spearheaded one of the first web-based curricula for pediatric radiology trainees. With over 80 modules, the website continues to be widely used by radiology residencies, pediatricians and medical students, nationally and internationally.

Goske finished her career as the Corning Benton Endowed Chair for Radiology Education at Cincinnati Children’s Hospital Medical Center in Ohio and retired as professor emeritus from the University of Cincinnati. She has led numerous ACR committees, including a multi-institutional pediatric consortium — the Quality Improvement Registry in CT Scans in Children — within the ACR Dose Index Registry that developed the first pediatric CT dose index in the United States.

Barry D. Pressman, MD, FACR
Los Angeles, California

Having spent most of his career at Cedars-Sinai Medical Center in Los Angeles, CA, Barry D. Pressman, MD, FACR, exhibits an enthusiasm for his work in neuroradiology that is still contagious after almost 26 years as professor and chair of the Department of Imaging.

After graduating from Harvard Medical School, Dr. Pressman found his way to radiology during a surgical internship at Brigham and Women’s Hospital. As a diagnostic radiology resident at Columbia-Presbyterian Medical Center, Pressman spent extra time at Presbyterian’s Neurological Institute before moving on to George Washington University in Washington, DC, for a neuroradiology fellowship.

Pressman has shared his passion for radiology as president of multiple medical societies, including the California Radiological Society and the Western Society of Neuroradiology. Throughout his career, he has been active in the ACR, serving as vice speaker and speaker of the ACR Council, Board of Chancellors member in multiple roles and president of the ACR from 2007 to 2008. He has also led or volunteered on 25 ACR commissions, committees, subcommittees and task forces, most recently the ACR Bylaws Committee.
Donald L. Resnick MD, FACR
San Diego, California

An ACR fellow since 1983, Donald L. Resnick, MD, FACR’s service to the College includes work on the Committee on Self-Evaluation and Continuing Education: Section of Bone 3 and 4.

Following medical school and residency at Cornell University/New York Hospital in New York City, Dr. Resnick spent more than 40 years at the University of California, San Diego. As an educator, he has trained nearly 200 clinical bone fellows from the United States and Canada, as well as 500 research fellows, many from Europe, Asia and South America.

Best known for his classic text in musculoskeletal radiology, *Diagnosis of Bone and Joint Disorders*, he has contributed 861 peer-reviewed articles, 25 books and chapters, and 59 invited articles and chapters. As professor emeritus at the University of California, San Diego, Resnick is now winding down his academic career while simultaneously working with five other editors on an update to his well-known volume, *Bone and Joint Imaging*. 
2018 HONORARY FELLOWS OF THE ACR

Corrado Bibbolino, MD
Rome, Italy

Following an illustrious career at the Lazzaro Spallanzani National Institute for Infectious Diseases, Corrado Bibbolino, MD, currently serves as secretary of the National Union of Radiologists and honorary director of the Italian journal *Il Radiologo*.

Soon after graduating from high school, Dr. Bibbolino decided to become a doctor. After serving in the military, he became a member of the radiology department of San Camillo-Forlanini Hospital in Rome, where he rose to the role of section head of Ultrasound. He later became chief of the departments of radiology, clinical services and research at the Lazzaro Spallanzani National Institute for Infectious Diseases.

He has contributed to the development of national guidelines for radiology practice, including the regulation of teleradiology. His influence and leadership have led to the establishment of recent Italian laws on health care security, professional liability in criminal matters and insurance reimbursement. He is a board member of the Italian branch of Choosing Wisely® and, since 2012, has been involved in the “slow medicine” movement, which focuses on a thoughtful, deliberate approach to patient care.

Bibbolino has been a speaker at approximately 200 events, authored or co-authored 37 peer-reviewed books, and contributed articles to nearly 100 scientific publications.

Yasushi Nagata, MD, PhD
Hiroshima, Japan

Yasushi Nagata, MD, PhD, currently serves as professor and chair of radiation oncology at the Hiroshima University Graduate School of Biomedical & Health Sciences and as director of the Hiroshima High-Precision Radiotherapy Cancer Center.

Having received his academic degrees and radiation oncology training at Kyoto University in Japan, he has written 395 peer-reviewed papers and authored or co-authored 54 book chapters. Nagata is editor of the book, *Stereotactic Body Radiation Therapy: Principles and Practices*, which serves as a practical guide for the use of stereotactic body radiation therapy in clinics.

Dr. Nagata’s accomplishments have paved the way for leadership positions as director of the Japanese Society for Therapeutic Radiology and the Japanese College of Radiology, as well as a councilor of the Japanese Society of Radiology, the Japanese Society of Medical Oncology and the Japanese Lung Cancer Society.

Currently, Dr. Nagata is the principal investigator of a national randomized phase III trial comparing two different stereotactic body radiation therapy regimens for lung cancer.

ACR DISCLOSURE POLICY / CONFLICT OF INTEREST

In compliance with ACCME requirements and guidelines, the ACR has developed a policy for review and disclosure of potential conflicts of interest, and a method of resolution if a conflict does exist. The ACR maintains a tradition of scientific integrity and objectivity in its educational activities. In order to preserve this integrity and objectivity, all individuals participating as planners, presenters, moderators and evaluators in an ACR educational activity or an activity jointly sponsored by the ACR must appropriately disclose any financial relationship with a commercial organization that may have an interest in the content of the educational activity.

The following faculty members, CME reviewers, planners and ACR staff declare that they have nothing to disclose.

ABSTRACT ePOSTERS

All abstracts are presented in electronic format (ePosters) and accessed through dedicated ePoster kiosks, Sunday, May 20 – Wednesday, May 23. Abstracts can also be viewed in the ACR 2018 meeting app, organized by category and abstract title.

Gold Merit Awards

The ACR will recognize the top abstract in each category. Recipients of ACR Gold Merit Awards will be announced on Tuesday, May 22 at 10:00 a.m. in the Marriott Ballroom (prior to the Moreton Lecture).

LEARNING OBJECTIVES:

Upon completion of this continuing education activity, participants should be able to:

- Implement key leadership and practice management skills to enhance the value-based care of radiology
- Discuss health policy trends, including delivery, payment models and MACRA, impacting the radiology health care field
- Review the key legislative issues that affect the radiology profession and develop skills to advocate for the profession
- Evaluate critical regulatory information on procedures and guidelines to enhance the practice of radiology
- Describe the latest innovative technologies, including machine learning, to improve performance and quality

Accreditation Statement:

The American College of Radiology is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

Credit Designation Statement:

The American College of Radiology designates this activity for a maximum of 11.25 AMA PRA Category 1 Credits™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

CLAIMING CREDIT

To receive your CE credit certificate, you must complete an online evaluation. Evaluations must be completed by July 23, 2018, in order to receive credit for attending the meeting.

Online evaluations can be accessed through the:

- **ePoster/Claim Credit** kiosks, located near the registration area from 6:30 a.m., Sunday, May 20 – Noon, Wednesday, May 23, and by the Washington Rooms, 6:30 a.m., Monday, May 21 – 9:00 a.m., Wednesday, May 23.
- **Credit Claiming Info** button on the ACR 2018 mobile app (accessible both during and after the meeting)
- **ACR Annual Meeting** website at acr.org/annual-meeting (accessible both during and after the meeting)
