

Provider sees patient, wants to know best imaging test to order

Provider calls imaging consult one-call number

Imaging Consult assistant gets basic information from Provider (patient name, dob, etc). Assistant also identifies which subspecialty is most appropriate

One-call assistant connects provider to radiologist. Goal is to use Primordial system or cell phones to limit provider wait time

Provider and radiologist discuss and agree on imaging test

Radiologist relays decision to Imaging Consult Assistant

**Data points to collect:**

- Call Date
- Call Time
- Patient Name
- DOB
- Patient insurance plan/type
- Subspecialty radiologist
- Optional:
  - Initial test requested
  - Test Agreed upon

Assistant Calls provider's office (or pre-services) with AIM authorization number

Assistant uses as provider radiologist to enter information into AIM

Yes

No

Encounter is complete, patient gets scheduled in fashion typical for that patient type
