

## Imaging 3.0: Call for Case Studies

ACR's Imaging 3.0 initiative is a roadmap to transition the practice of radiology from volume-based imaging to value-based imaging care. It is a multiphase program designed to enable radiologists to shape their future using tools and processes for practice management and patient care.

Imaging 3.0 goes beyond interpretation to include such topics as appropriateness, decision support, value-based payment, radiation quality and safety, meaningful use, technology integration, actionable reporting, image sharing, referring physician relationships, payer relationships, patient-centered radiology, and more.

Complete this form to submit your case study idea. A member of the ACR Imaging 3.0 team will contact you within two weeks of submission.

<b>First Name</b>	
<b>Last Name</b>	
<b>Credentials</b>	
<b>Practice/Hospital Name</b>	
<b>ACR Member</b>	Yes    No
<b>Imaging 3.0 Topic</b>	
<b>How your practice implements Imaging 3.0</b>	
<b>Results</b>	
<b>Lessons Learned</b> (practical actions for the radiology community)	
<b>Email</b>	
<b>Phone</b>	

Save form after completed, then send to Imaging 3.0.
