Darel Heitkamp, MD @DarelHeitkamp
T1: One important goal is filling in your knowledge gaps regarding how imaging findings impact patient management in your subspecialty. While this sounds like a huge task, hopefully much of the foundation has already been laid in residency. #RadResChat @ACRRFS @theAPDR https://t.co/WNEMhyb3DB
Nicholas Koontz @nakoontz
T1: This is where the aims of #RadRes vs #RadFellow differ. I think the primary goal of residency is to become an autonomous radiologist. While increased autonomy is a major part of fellowship, I think the central goal is to transition to level of an expert. #RadResChat @ACRRFS

Thomas Reher, MD @tareher
RT @ACRRFS: T1: What should be the primary goals of fellowship? #RadResChat #radres #iradres #radfellow @RadiologyACR https://t.co/kG3PJfE...

Kirang Patel, MD @koolkpMD

Nicholas Koontz @nakoontz
And the GIFs are in play! #RadResChat

Amina Farooq @AminaFarooqMD
RT @ACRRFS: T1: What should be the primary goals of fellowship? #RadResChat #radres #iradres #radfellow @RadiologyACR https://t.co/kG3PJfE...

ACR Radiology @RadiologyACR
RT @DarelHeitkamp: T1: One important goal is filling in your knowledge gaps regarding how imaging findings impact patient management in you...

Darel Heitkamp, MD @DarelHeitkamp
T1: Understanding your subspecialty through the eyes of your clinical colleagues means spending time w/ them during fellowship. Participation in multidisciplinary conferences & tumor boards is a must. Also consider spending some mornings w/ them in clinic. #RadResChat @ACRRFS https://t.co/MGNIsNlpLW
Yasha Parikh Gupta, MD @yashaguptamd
Also would love to know secondary and tertiary goals like, should I do fellowship where I plan to practice? Is this where I can meet people? Is it all about the name?!
#RadResChat

ACR Radiology @RadiologyACR
RT @nakoontz: T1: This is where the aims of #RadRes vs #RadFellow differ. I think the primary goal of residency is to become an autonomous...

Kirang Patel, MD @koolkpMD
T1: I think the primary goal of fellowship is to gain the knowledge to become an “expert” in a particular subspecialty. #RadResChat

Amina Farooq @AminaFarooqMD

RT @yashaguptamd: Also would love to know secondary and tertiary goals like, should I do fellowship where I plan to practice? Is this where...

Jennifer R Buckley, MD @JBuckleyMD
@ACRRFS @RadiologyACR T1: Primary goal of #RadFellow should be to become an expert in your chosen area! Build on your foundation of skills as a #RadRes and fill in necessary gaps before becoming staff. #RadResChat

Nicholas Koontz @nakoontz
T1: Put another way -- #Radiology fellowship allows you to transition from being someone who can "read X study" or "perform Y procedure" to be THE go-to person in your group for said study or procedure. The goal of fellowship is for the buck to stop with you. #RadResChat @ACRRFS

Nicholas Koontz @nakoontz
@koolkpMD I agree. Fellowship is a time to take the deep dive and immerse yourself with the goal of expertise. #RadResChat

Cody Quirk @CQuirkMSK
I agree with @nakoontz and @DarelHeitkamp and would add that it can fill out any gaps from prior training programs ie more/new procedures #RadResChat
Wynton Overcast @OvercastMD
Hey all Wynton Overcast here, R1 @IURadiology looking forward to it! #RadResChat

Cameron Adler @CameronAdlerMD
Hello everyone! R3 from Mayo Clinic Arizona currently in the middle of fellowship applications. #radreschat

Robert Peng, MD, MS @RobertPengMD
@ACRRFS @RadiologyACR T1: To train at the program where you will grow the most. Whether it will be with regards to clinical skills, academically, professionally, personally. For me that was a place with strong clinical training and academic support. #radreschat #radres #iradres @RadiologyACR

Daniel Ortiz, MD @danortizmd
Sorry. Can’t join for the whole hour: anniversary night, but I’ll give a few thoughts. Daniel Ortiz, private practice (the real kind) general and MSK radiologist and immediate past chair of @ACRRFS #RadResChat

Daniel Ortiz, MD @danortizmd
T1: Your primary goal in fellowship is to acquire the skills to pursue the practice you envision for yourself (or at least as close to it as possible). Don’t go for biggest name. Go for skills set YOU want to acquire. #RadResChat

Daniel Ortiz, MD @danortizmd
T2: Biggest challenge for apply to fellowship is balancing finding a fellowship that has some geographic relationship with where you want to practice (unless you have an in otherwise) and matching the skills you want to obtain. #RadResChat
Daniel Ortiz, MD @danortizmd
T3: + for match is you get to sample lots of flavors of subspecialty training. - is $ and time waiting. If you’re doing match, cast a wide net. If not, approach your targets early and accept a “good enough” place. Programs won’t tend to wait around. #RadResChat

Daniel Ortiz, MD @danortizmd
Parting thought: Don’t waste your fourth year and resist the need to use it as a “pre-fellowship.” Chose OTHER skill sets you won’t be getting in fellowship. Get as much advanced training in other things as you can four year. Most of PP is what you did in residency. #RadResChat

Daniel Ortiz, MD @danortizmd
To clarify, if you are going for sub-sub specialty (ie. Peds IR or Neuro) or a subspecialty of body or Neuro, that’s understandable, but no sense in doing both #mskrad and #NeuroRad fellowships. I do however think MRI fellowships are great for PP. #RadResChat

Daniel Ortiz, MD @danortizmd
This is ESPECIALLY true for #irad. My opinion is the ESIR pathway (2 years of 0 diagnostic) is a disservice to #iradres for those wanting to do PP. I think #iradres should focus on advanced #bodyrad and #EDrad towards the end of their DR training. #RadResChat

Robert Peng, MD, MS @RobertPengMD
For all #radres and #iRadres who missed the #radreschat yesterday, don’t worry join now and engage! Just search “#radreschat” Even though the chat has ended, the discussion never does. @ACRRFS @SIRRFS @RadiologyACR https://t.co/TTcMiUUMtU
