Darel Heitkamp, MD @DarelHeitkamp

2 days ago

T1: One important goal is filling in your knowledge gaps regarding how imaging findings impact patient management in your subspecialty. While this sounds like a huge task, hopefully much of the foundation has already been laid in residency. #RadResChat @ACRRFS @theAPDR <https://t.co/WNEMhyb3DB>

Nicholas Koontz @nakoontz

2 days ago

T1: This is where the aims of #RadRes vs #RadFellow differ. I think the primary goal of residency is to become an autonomous radiologist. While increased autonomy is a major part of fellowship, I think the central goal is to transition to level of an expert.
#RadResChat @ACRRFS
