Today’s Speaker

Lawrence R. Muroff, MD, FACR is the immediate past CEO & President of Imaging Consultants, Inc., providers of consulting services to radiologists, hospitals, and corporations. He is also an Adjunct Clinical Professor of Radiology at the University of Florida and the University of South Florida Colleges of Medicine. For 20 years he was a member of a 45+ radiologist practice where he held several leadership positions, including serving as president.

Dr. Muroff is an honors graduate of Dartmouth College and Harvard Medical School, a member of Phi Beta Kappa and Alpha Omega Alpha, and a recipient of the Gold Medal of both the Florida Radiological Society and the American College of Radiology. Dr. Muroff is listed in Who’s Who in America and Who’s Who in the World. He is also listed in the publication, The Best Doctors In America 2000. His radiology socio-economic expertise and his educational expertise were recognized in separate cover stories in Diagnostic Imaging; similarly he was featured in a cover story in Imaging Economics. Dr. Muroff was designated by Aunt Minnie as Radiology's Most Effective Educator: 2010, and was awarded the 2016-2017 Distinguished Career Achievement Award by Dartmouth Medical School.

Dr. Muroff has served as president of several national and regional imaging organizations; he is an inaugural member of the Board of both the ACR's Radiology Leadership Institute and the Neiman Health Policy Institute; he has authored more than 80 scientific and socio-economic articles; and he has presented over 1100 invited lectures throughout the United States and Europe.
Developing Younger Radiology Leaders: Succession Planning

Lawrence R. Muroff, M.D., FACR

Disclosure

- Regrettably, I have nothing to disclose.
Developing young radiologist leaders and succession planning, while peripherally related, are in reality two distinct topics.
Let’s first look at succession planning, and understand why it is important for radiology groups.

Without appropriate succession planning, at times of transition (planned or unexpected) groups can flounder rudderless and be at a major competitive disadvantage (or worse).
What Doesn’t Work for radiology practices and their leaders?
With rare exception, groups that rotate the president of the practice basically are saying that the business executive is the de facto leader of the group.

While this might sound good, in my experience, the best circumstance for a practice is when the business executive and the radiologist leaders work synergistically together.
Physician President

1) Empowered to act on behalf of group according to Mission Statement/Business Plan

2) Finite Term: Should be re-elected

Succession Planning, 2020, Dr. Muroff
Physician President

3) The practice members must understand the importance of administrative time and must allocate sufficient time for the president to do the tasks that are necessary to build and sustain a practice.

4) The president must communicate well with the practice members

Why is it important to elect the “correct” practice president?
Leadership requires certain skills. You wouldn’t rotate your neuro-radiologist into a women’s imaging rotation; why would you rotate radiologists without the needed skills into positions of practice leadership?

Needed Skills for a Practice President

1) Consensus Building
2) HR knowledge
3) Negotiation skills
4) Emotional Intelligence
5) Maturity (not age).
How should your practice groom and keep its leaders in positions that maximally benefit the group?

Governance and Succession Planning

1) Implement a corporate form of governance.
2) Elect your president with the idea of permanence. The president may stand for reelection every 3-4 years, but think about substantial tenure when you vote for that position.
3) Executive Committee members are ideal candidates for succession planning.
Governance and Succession Planning

4) The succession process should begin at least 3 years before the transition is to take place.
5) Identify 2-4 candidates and give them projects to manage.
6) Set appropriate timelines for project completion and hold the individuals accountable for their successes and failures.

7) Make sure that several practice members have leadership training.
8) Needed skills include consensus building, HR knowledge, negotiations, emotional intelligence, and maturity (not age).
9) Appropriate meetings might include the RLI Summit, the ACR Annual Meeting, the ACR RBMA Practice Leaders’ Forum, and the Economics of Diagnostic Imaging: National Symposium.
Developing Young Radiologist Leaders
Young radiologists will rarely, if ever, out-maneuver the older members of the practice. Attempts to do so will invariably cause unnecessary disruption and result in frustration for both the young radiologist and the older radiologist.

That statement is not meant to give any radiologist (no matter what his/her age) a “free pass”, but rather if there is a problem, it is usually the established leadership that can remedy it.
In most groups there are older radiologists who can serve as role models and mentors for the younger members of the practice, particularly those who aspire to leadership roles.

How Should Young Radiologists Get Involved in Practice Leadership?
Leadership in a practice is a process/journey. You don’t join a practice and immediately become its president, but you can make a difference from the beginning and develop the skills that a practice needs/requires from its leaders.

What can a young radiologist do to make a difference in a practice?
Young Radiologists’ Tasks

1) Read everything that pertains to the practice-hospital contracts, employment agreements between the group and its radiologists, bylaws, policies, etc.

2) Serve on practice and hospital committees.

3) Attend leadership meetings discussed previously.

4) Remember that an important part of leadership is “followership”. Being a good follower is, in most cases, a prerequisite for assuming a leadership role in a radiology practice.
WE'VE ONLY SCRATCHED THE SURFACE.

Bruce Beehler
Looking forward to a valuable and informative Q & A session

Q&A Discussion
Thank you.
