

Qualified Clinical Data Registry (QCDR) MIPS Measures Supported 2019

Data collection method:

Data for MIPS measures may be submitted through data file upload to the **MIPS Portal of the NRDR registry** using ACR provided templates and specifications. CMS requires physicians and groups to report on all patients (Medicare and Non-Medicare) that are applicable to a measure.

Data collection period: January 1, 2019 through December 31, 2019

Data submission deadline: January 31, 2020

Notes:

! = High priority measure.

* = Inverse measure. A lower calculated performance rate for this measure indicates better clinical care or control. For inverse measures, a performance rate of 100% means all of the denominator eligible patients did not receive the appropriate care or were not in proper control.
