

QCDR Webinar #2

Navigating the NRDR and MIPS Portals

Zachary Smith, Quality Management Programs

Priya Sharma, Quality & Safety

June 21, 2018

What we will cover

- QPP Eligibility & Measure Lookup tools
- NRDR Portal demo
 - Common account setup errors
- MIPS Portal demo
 - How to submit MIPS data
 - How to review MIPS performance reports
- NRDR Helpdesk demo
- Important deadlines

QPP Eligibility & Measure Lookup Tools Now Available

- [QPP Eligibility Lookup Tool](#)
 - Use to determine whether an NPI is required to participate in MIPS for 2018
 - Also includes patient-facing status determination
- [QPP Measure Lookup Tool](#)
 - Recently updated for 2018
 - Available on CMS website to review Quality measures, Improvement Activities and Promoting Interoperability measures
 - Use this to develop your MIPS participation plan

Using NRDR as a QCDR

The NRDR and MIPS Portal gives clinicians and groups control over the MIPS data collection and reporting process. Specifically, the portal helps clinicians with:

- ❑ **Collecting Data:** The MIPS portal accepts data and information for three MIPS categories: Quality, Improvement Activities (IA), and Promoting Interoperability (PI).
- ❑ **Monitoring Performance:** Throughout the year, clinicians and groups can get a snapshot of their official performance to date for both MIPS and QCDR measures using the Performance Report tab.
- ❑ **Reporting to CMS:** Clinicians can use their MIPS Portal performance data to identify and select those measures best representing their individual or group practice. NRDR will then submit the selected measures and activities to CMS before the performance year reporting deadline.

Note: Registry vendors are required to capture data on **both** Medicare and Non-Medicare patients to satisfy data completeness.

QCDR Participation Requirements

- Facility or group must have a signed participation agreement for the MIPS registry on NRDR account
- Physician NPI and TIN information are required on all accounts
- Monitor performance via feedback reports and/or MIPS portal
- To use the QCDR, some data must be submitted by 10/31/18
- Indicate your GPRO status in NRDR and MIPS portal

QCDR – The Most Common Errors

- Registration has not been accepted
- Child facilities do not have NPI/TIN association
- Child facilities are not registered in MIPS
- Physician Template does not load correctly
- Physicians have not registered in the MIPS portal (this is not the same as enrollment)
- Data for CTC/DIR/LCSR/GRID/NMD/IR is being submitted to the Master and not the child facilities

User

- QCDR participants access a portal designed especially to manage the MIPS participation process
- MIPS portal provides:
 - Location for MIPS measure file upload
 - Review of MIPS and Non-MIPS quality measure performance data and CMS benchmarks
 - Selection of measures and required attestations prior to CMS submission
- Physician and group level performance data available for all physicians across multiple locations and TINs

Accessing the MIPS Portal

- To access the **MIPS Participation Portal**, start by logging in to the [NRDR Portal](#) with your username and password.
- Once you are logged in, select **MIPS Participation Portal** from the NRDR menu, and then **Data Collection and Reports** to open the MIPS Portal.

The screenshot shows the NRDR (National Radiology Data Registry) interface. The top header includes the NRDR logo and the text "NATIONAL RADIOLOGY DATA REGISTRY" and "AMERICAN COLLEGE OF RADIOLOGY". On the right side of the header, it says "MIPS Participation Portal". Below the header, there is a navigation menu on the left with the following items: "MIPS Participation Portal", "Registry Management", "Registration Information", "Data Collection and Reports" (circled in blue), "QCDR Web Resources", and "NRDR". To the right of the menu, there is a user information bar showing "User Name: tfruscello | User Type: ACR Staff | Facility: 100000: ACR Test" and a "Logout" button. Below the user information bar, there is a "MIPS" section with a "NOTICE:" heading. The notice contains three bullet points: "By October 31, 2017, physician or group practice must register for NRDR with intent to use the QCDR for MIPS Participation. Must start submitting data to ACR by this time and be sure PQRS/MIPS is on your registry account.", "By January 31, 2018, physician and group practices must complete submission of quality data and improvement activities to the QCDR (Exception: Data for the Dose Index Registry (DIR) is needed by December 31, 2017)", and "By March 31, 2018, this deadline is for submission of quality measure data and improvement activities by NRDR to CMS."

MIPS Participation Portal Live Demo

Key Takeaways

- ❖ Register your facility and physicians in NRDR for MIPS
- ❖ Review data submission requirements and processes
- ❖ Monitor MIPS portal to view exam counts and performance data
- ❖ Notify ACR of any discrepancies in data submitted to the NRDR or MIPS portal
