Please be aware that a particular radiologist may not be immediately available for consultation as they may be doing an invasive procedure or consulting with another Provider. If your inquiry is regarding a review of a particular case, it will likely save you time if you leave a detailed message with our clerical staff at [Ext.], allowing us time to review all the pertinent cases before we call you back. If you just need a direct discussion with a radiologist, please call us directly according to the schedule above. We suggest trying the extension first as cellular coverage may be spotty in the Medical Imaging Department.
