

Melissa A. Davis, MD, MBA

Dr. Davis is Assistant Professor at Emory School of Medicine where she also serves as Medical Director for Quality in the Radiology Department. She completed her BA in Chemistry and Psychology at Wellesley College in Wellesley, MA. In 2009 she received her medical degree from the Medical University of South Carolina in Charleston, SC. Subsequently she completed a Diagnostic Radiology residency and a Neuroradiology fellowship at the University of North Carolina in Chapel Hill, NC. Dr. Davis obtained her MBA in 2017 from Yale University with a focus in healthcare management.

Since completing her MBA, Dr. Davis has focused her professional and academic areas of interests in organizational change and innovation within the healthcare space. As a physician, her core objective is to serve the needs of the patient. To wholly serve the patient requires more than the interaction at the point of care, but rather creating and functioning within a system built to support the patient and providers. This has driven the early focus in her career on operational workflows and improving quality within the inpatient and ambulatory spaces through innovative approaches and new technologies.
