

Recommendations of the ACR Data Safety Monitoring Board

January 21, 2020

The ACR Data Safety Monitoring Board (DSMB) met via webinar on January 21, 2020 to review ACRIN 4703/DECAMP-1 and ACRIN 4704/DECAMP-2. This report is being provided to the DECAMP investigators for transmission to participating sites' local IRBs.

The ACRIN Biostatistics and Data Management Center prepares a study data report for the DSMB, which includes aggregated and summarized adverse event data. The DSMB report and review included examination of adverse events, consideration of whether studies were making adequate progress towards completion, and, when appropriate, examination of interim outcome results. Results from other studies and other recent literature that might be relevant to the research were also considered.

The DECAMP DSMB charter is available upon request by contacting Irene Mahon at imahon@acr.org.

The DSMB recommendations for the DECAMP studies are listed below.

ACRIN 4703 | DECAMP 1: Diagnosis and Surveillance of Indeterminate Pulmonary Nodules

Study Chairs: Ehab Billatos, MD and Denise Aberle, MD

Statisticians: Constantine Gatsonis, PhD and Fenghai Duan, PhD

Recommendations:

- Close enrollment as of 2/2020
- Continue per protocol

ACRIN 4704 | DECAMP 2: Screening of Patients with Early Stage Lung Cancer or at High Risk for Developing Lung Cancer

Study Chair: Ehab Billatos, MD and Denise Aberle, MD

Statisticians: Constantine Gatsonis, PhD and Fenghai Duan, PhD

Recommendation:

- ACRIN study team to submit a monthly report to the DSMB to provide an update on the implementation and status of the strategies proposed to improve accrual
- Continue per protocol

The next DSMB review of the DECAMP studies will be scheduled for July 22, 2020.
