Interactive Dinner Symposium

Monday, May 16, 2016
Washington Marriott Wardman Park
Thurgood Marshall Ballroom Southeast
Mezzanine Level | Washington, DC

5:30 PM – 6:00 PM
Registration & Dinner
6:00 PM – 7:30 PM
CME-certified Activity

SITUATION ROOM

Heterogeneous HRCT Patterns of
IDIOPATHIC PULMONARY FIBROSIS
Examining the Radiologic-Clinical-Pathologic Correlation

Faculty
Brett M. Elicker, MD
Kevin O. Leslie, MD
Steven D. Nathan, MD

This continuing medical education activity is provided by VINDICO medical education.
This activity is supported by an educational grant from Genentech, Inc.
This independent satellite symposium is not part of the ACR 2016.

Overview

Idiopathic pulmonary fibrosis (IPF) is a chronic progressive lung disease with survival comparable to many cancers. The historical standard of care for IPF is oxygen supplementation, management of co-morbidities, and lung transplantation. The therapeutic landscape for IPF management is rapidly evolving. Diagnosis may be challenging for radiologists, pulmonologists, and pathologists alike, as IPF can mimic other fibrotic lung conditions. It is imperative that radiologists are able to accurately diagnose the usual interstitial pneumonia (UIP) pattern of IPF promptly, so that patients can be referred and treated in a timely manner. In this activity, thought leaders in pulmonology, thoracic radiology, and pathology will address the gaps in knowledge in accurately diagnosing IPF, using appropriate imaging modalities as well as laboratory studies. Clinical evidence regarding current FDA-approved pharmacotherapies used for the management of IPF will also be presented.

Learning Objectives

Upon successful completion of this educational activity, participants should be better able to:

- Examine the pathophysiology, burden, and difficulties associated with the diagnosis of idiopathic pulmonary fibrosis to better understand why it may be misdiagnosed or underdiagnosed.
- Differentially diagnose idiopathic pulmonary fibrosis, using the appropriate imaging modalities and laboratory assays to enable earlier treatment and improve patient outcomes.

Agenda

6:00 PM - 6:05 PM
Introduction and Pretest

6:05 PM - 6:30 PM
The Burden: Assessing the Impact and Pathophysiology of IPF

Kevin O. Leslie, MD
Mayo Clinic
Scottsdale, AZ

6:30 PM - 6:55 PM
The Patterns: Examining Patterns that Aid in the Differential Diagnosis of IPF

Brett M. Elicker, MD
University of California, San Francisco
San Francisco, CA

6:55 PM - 7:20 PM
The Treatment: Emerging Trends in Treatment of IPF

Steven D. Nathan, MD
Virginia Commonwealth University
Falls Church, VA

7:20 PM - 7:30 PM
Posttest and Question and Answer

Vindico Medical Education is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians. Vindico Medical Education designates this live activity for a maximum of 1.5 AMA PRA Category 1 Credit(s)™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

In accordance with the Accreditation Council for Continuing Medical Education’s Standards for Commercial Support, all planners, teachers, and authors involved in the development of CME content are required to disclose to the accredited provider their relevant financial relationships. Relevant financial relationships will be disclosed to the activity audience.

Faculty, topics, program schedule, and credit hours are subject to change. Audiotaping or videotaping is prohibited without written permission from the program committee.

This independent satellite symposium is not part of the of the ACR 2016 CME program. The ACR 2016 Program Committee has reviewed and approved this symposium as an Independent Satellite Symposium. Any opinions or conclusions expressed are solely those of the presenters. Where noted, CME is made available by third party providers. Credit must be claimed through the accrediting organization and separately from your ACR 2016 or ACR 2016 Virtual Meeting credit. Please contact Vindico Medical Education for more information.
Examine current clinical evidence regarding the efficacy and safety of pharmacotherapies now used for the management of idiopathic pulmonary fibrosis.

Target Audience

The intended audience for this activity is radiologists, pulmonologists, pathologists, and other health care professionals involved in the diagnosis and/or treatment of patients with IPF.
